## EXPERIENCE

**CHILI Publish**                                                                              **Mar. 2022 – Present**
*Client Success Engineer*                                                                              *Denver, CO*

- Ensure clients are successful with their integration and development with the CHILI Publisher application
  - Consult clients building an integration for the product. Experience in many environments
  - Answer client questions and provide custom code examples for specific scenarios
- Manage Python SDK for interacting with a REST API and performing CHILI document manipulation
- Help the delivery team diagnose and troubleshoot software issues. Create workarounds for clients.

**Cloud-Screen**                                                                              **Mar. 2019 – Dec. 2021**
*Contract - Lead Developer*                                                                              *Denver, CO*

- Cloud-Screen is a web-based digital presentation creation software developed for Interactive Display Solutions (IDS inc.)
  - Allow clients to create interactive presentations for use cases such as digital sign creation, interactive public displays, collaborative work, and educational content.
- Responsible for planning, developing, and modifying the website to match the customer's vision and goals for the platform. Lead a small development team to achieve this.

**AM Solutions SC**                                                                              **Jan. 2019 – Mar. 2022**
*Owner*                                                                              *Denver, CO*

- Independent contractor for both electrical work and I.T. systems.
  - Primarily commercial contract work with WillScot and residential repair.
  - Managed company operations, contract negotiations, and marketing/SEO.
